DOMESTIC SERVICE IN ENGLAND. The Largest Single Industry for Men and Women.

London Times. In London the average money wages of female servants is a little under £18 a year. but as this calculation includes in one class both the little lodging house "slavey" of fifteen and the well-paid and highly trained cook or housemaid in a West End family, the calculation is a somewhat barren one. It is more instructive to note that by far the greatest number of female servants are between the ages of fifteen and thirty-five, and that, as a rule, their remuneration is more or less progressive up to the latter point. From thirty-five to forty-five the numbers greatly diminish, but the level of wages is higher, while above forty-five, with

a further numerical decrease, it seems to decline. In England and Wales, outside London, the average money wages is reckoned at £15 10s a year, but in the three great Scotch cities, Glasgow, Edinburgh and Dundee, they come very close to the metropolitan level. In the large English provincial towns the level is lower than in London and the Scotch towns, owing to the fact that a much larger percentage of the employes are under twenty.
In Ireland no estimate of average wage has been found to be possible, but it is certain that the rate is generally much lower than in Great Britain. In all parts of the kingdom, as might be expected, the money wage rises in accordance with the number of servants employed, and so does the average of age. It is noteworthy, at the same time, that there is little opportunity for the

er wages obtained by those of mature age is an indication that the incompetent are very largely eliminated as well as that experience and character can command their The importance of domestic service for women may be estimated from the fact that, at the census of 1891, those so employed were returned as nearly 1,750,000. It is thus, Mr. Llewellyn Smith says, "the largest single industry for either men or

transfer of those trained in small families

to larger establishments, and that the high-

Weak Bank Statement Did Not

At New York Saturday, money on call was easier, with transactions at 3 per cent. Prime mercantile paper, 31/2041/4 per cent. Sterling exchange was heavy, with actual business in bankers' bills at \$4.86% @4.87 for demand, and at \$4.83\2@4.83% for sixty days; posted rates, \$4.84\2@4.85\2 and \$4.88@4.88\2; commercial bills, \$4.83@4.84.

Silver certificates, 60%@61c; bar silver, 6014c; Mexican dollars, 48c. At London bar silver closed quiet at 27 11-16d an ounce. The New York weekly bank statement shows the following changes: Surplus reserve, decrease\$1,244,475 Loans, decrease 8,334,500

Specie, decrease 4,241,400 Legal tenders, decrease 187,900 Deposits, decrease 12,739,300 Circulation, decrease 27,600 The banks now hold \$10,811,125 in excess of

the requirements of the 25 per cent rule. The New York Financier says: "The statement of the New York clearing-house banks for the week ending July 29 cannot be regarded as a favorable exhibit, although there is good reason for saying that it does not show the real condition of the banks at the close of business Saturday. The loss of nearly four and one-half millions in cash, for example, is much more than the six days' personal or by letter, given prompt operations called for. The contraction of \$12,739,200 in deposits reduced reserve require-

ments by over \$2,000,000, so that despite the

shrinkage of \$4,429,300 in specie and legals. the excess declined only \$1,244,475, leaving the surplus at \$10,811,125.

"The deposit loss, as usual, is to be traced to a few of the mort important institutions, the National City Bank being responsible for about five millions of the total. On the other hand, the gain of nearly as much by the National Park Bank, accompanied by a proportionate addition of specie, stands in direct contrast with the trend of the other | National Biscuit pref banks. The liquidation in loans continues, National Lead pref the week making a total of more than \$34,000,000 in four weeks. In the same time deposits have declined forty millions and specie and legals something in excess of four millions. It is to be noted that while on July 8 the surplus reserve was but five millions, the clearing institutions, despite the fact that they have four millions less cash now than at that time, still report six millions more of excess reserve. This has been made possible by the liquidation of outstanding commitments, but it is becoming a question how much further the process be continued. Loans are now the smallest since the middle of February and in the last six months the banks have lost twenty-eight millions in specie and legals. The continued loss of cash to the treasury trend of the markets. This knowledge is and the approach of the crop season, with the secret of my success. I TRANSACT its demands on the resources of this center. make the immediate future an interesting subject for speculation. Still, as bank balances have in many instances been diverted

from New York, the demand may fall more or less on other large cities." The New York stock market for Saturday's short session was strong. A large volume of realizing was well digested by reason of an increased demand to the commission houses and the market stood up well under a bank statement that was unexpectedly weak, the majority of stocks showing net gains when trading was over for the day. London continued to buy stocks with considerable confidence and this was the prime factor in the opening rise and in the further decline in sterling exchange rates. The money market was largely nominal, but there is evidence of quite liberal the human race. If I win for you, I WANT offerings of funds from outside sources. The high level of railroad earnings shown by all companies reporting and the reported eager demand to buy, borrow or rent freight cars from many sections of the country was a potent source of strength for stocks. Northern Pacific, Pennsylvania and P., C., C. & St. L. enjoyed the benefit of the published June statements, showing largely in-MY PHENOMENAL SUCCESS IS DUE creased net earnings. Burlington's strong TO THE FACT THAT I CONCENTRATE June statement brought realizing. The coalers were helped by the statement of Lehigh Valley, reflecting a growing improvement ABLE DEALS AND REMITTING THE in the long depressed anthracite industry. PROFITS TO MY CLIENTS AS OFTEN Reports of the unprecedented activity and strength in the iron trade caused advances in the prices of steel and iron stocks, with the exception of Federal Steel. American Steel and Wire rose over a point. This factor helped the railroads situated in the iron regions, notably Louisville & Nashville. American Tobacco was marked up five points on light transactions and with no news to explain the rise. International Paper preferred and Consolidated Gas rose two points. The decline after the bank statement was checked by good absorption, but the recovery was not to the top level. The closing was quiet and firm. Bonds were well held on a moderate volume of business.

The course of the stock market during the week has shown evidences of awakened interest and strength. The principal apprehension has been over the future of the money market. All accounts have agreed upon the unusual abundance of funds at all interior centers, but the activity of trade and industry are also unprecedented, and the enormous volume of bank clearings | the week aggregated \$725,015. throughout the country shows that more money is turned over in profitable employment than ever before. The question has been whether in moving the crops the usual demand would be made on Eastern centers for money, or whether the large funds at interior points would prove ample. This question is not answered definitely yet. Call money in New York has continued pretty firm, and it developed during the week that many Stock Exchange houses were resorting to time loans. This resulted in a hardening tendency of the time money rate, and as there was apprehension that a money squeeze in the call loan department might intervene demands began to be felt for crop-moving purposes. Except for domestic dis-quiet in France the outlook is for easier noney abroad, and sterling exchange at New York has shown a sharp decline to-wards the end of the week. New York mercantile paper has been reported as selling in Chicago. The money condition in New York is affected by the failure of some new industrial securities to meet expectations. Some of these have declined sharply from the subscription prices or from the prices taken as a basis for distribution of New York securities in exchange for those of constituent companies. Money supplies for underwriting has thus been kept tied up waiting to realize. Not a little of the longcontinued speculative doubt has been due to the threatened Transvaal trouble, with a special view to its probable effect on the gold production of the Rand. The expected large supply of gold from this source is a factor in the estimates of future world prices. The various causes of inactivity, however, have tended towards amelioration during the week. The period of hazard to the crops has come nearer its end. Industrial activity continues unabated, international trade and railroad earnings break all records and the export trade is proving it-self permanently established at a new high level. The strength of stocks, which de-veloped first in a few obscure and isolated cases, then in the Southwesterns and Louisville and later in the grangers, has per-meated pretty much the whole list through-

out the week. Bonds were dull and heavy during the early part of the week and did not respond to the late strength to the same extent as stocks. United States threes, registered, declined 14 and the threes, coupon, 14 in the Following is a list of sales on the New York Stock Exchange Saturday, with the

SHORTS SQUEEZED

ONE CHICAGO SPECULATOR CON-TROLLED THE OATS MARKET.

Grain Futures Weak on Advers Cable News and All Lines Scored Declines-Provisions Lower.

CHICAGO, July 29 .- Wheat lost an early advance of half a cent to-day and closed weak at a decline of 1/201/4c. Corn lost %c, oats 1/2c and provisions lost 21/2@71/2c, the latter in pork.

Apprehensions of frost, higher cables from Liverpool and reports of lack of moisture in India caused a firm and higher opening in wheat. September started 1/2%c higher at 71%@71½c. Transactions at 71½c were extremely light and the market immediately sank on heavy realizing and sales against calls. Before 11 o'clock September touched 70% @70%c. Indian shipments of 1,440,000 bushels, with estimated world's shipments of 6,800,000 bushels for the week, more than offset fears of frost in the spring wheat belt. Receipts at primary Western markets were 800,000 bushels, against 527,000 last year. Minneapolis and Duiuth receipts, 344 cars, against 319 yesterday and 179 a year ago. Chicago received 119 cars, against seventynine a year ago. On the early decline there was considerable covering, which, together with buying against puts, caused a sharp rally to 71% @71% for September. The strength was short-lived, however, and just before the close September again touched 70%c, closing with sellers at 70% @71c. Atlantic port clearances were 444,459 bushels, wheat and flour.

Corn ruled weak throughout on reports of heavy rains in the Southwest, which dissipated all fears of drought. Receipts here were 600 cars. Cash trade was fair, 100,000 bushels being worked here for export, Country offerings were large and elevator representatives sold freely against country purchases. September opened unchanged to 4c lower at 311/2@31%c, sold off to 311/2c and closed %c net lower at 31%c.

A squeeze of July shorts was the feature of the oats market. July was forced up 14c; turpentine, 47@55c; glycerine, 14@17c; iodide | 25%c and closed strong at 26c after selling as high as 27c. September was dull and featureless. Local receipts were 630 cars. September opened steady at 19%c, declined to and closed at 19%c. The July option is en-tirely under the control of a leading local professional, who took advantage of the light country offerings to-day to run up the market on those who are presumably short to

> Provisions ruled dull and slightly easier on light country liquidation. Packers were credited with selling on a moderate scale, but the trade generally appeared to be in a waiting mood. September pork sold be-tween \$8.92½ and \$8.80, closing at \$8.82½, a net loss of 7½c. September lard sold be-tween \$5.40 and \$5.45, closing at \$5.42½, a net loss of 21/2c. September ribs sold between | ket quiet; Western, 10@15c. \$5.10 and \$5.20, closing 21/2c net lower at Estimated receipts for Monday-Wheat, 110

Dry Goods.

NEW YORK, July 29.-Local conditions in the dry goods market are satisfactory. The demand for nearly all lines of staple cottons has increased during the week. These changes have not seriously interfered with the demand, though the volume of business now being developed is not large. The print cloth market remains firm at the trustee's price of 2%c for regular cloths at Fall River, and a parallel market exists in Providence and other outside markets. Sales during the week have been light. Odd goods are in steady demand and unchanged. Advices received from various sections of the country tell of heavy sales of dark prints and a continued demand for goods to be delivered at an early date. The market for ginghams is also reported to have received a stimulus through recent sales, and the situation is a decidedly stronger one.

NEW YORK, July 29.-Petroleum firm; refined, New York, 7c; Philadelphia, and Baltimore, 7.65c; Philadelphia and Baltimore, in bulk, 5.15c. Rosin steady; strained, common to good, \$1.30@ 1.321/2. Spirits of turpentine steady at 431/40244c. WILMINGTON, July 29 .- Spirits of turpentine -nothing doing; prices unchanged. Rosin steady and unchanged. Crude turpentine firm and unchanged. Tar firm at \$1.50.

OIL CITY, Pa., July 29.—Credit balances, \$1.25. Certificates, no bid. No shipments or SAVANNAH, July 29 .- Spirits of turpentine

firm at 41%c. Rosin firm and unchanged.

LONDON, July 29.-Since the last series of wool auction sales a few bales of Queenslands were old at slightly higher rates, otherwise the market is quiet. The arrivals to date for the coming series, which will open on Sept. 19, aggregate 168.341 bales, of which 51,500 were forwarded diect. The imports for the week are: New South Wales, 621 bales; Melbourne, 1,896 bales; South Australia, 1,400 bales; New Zealand, 893 bales; Cape of Good Hope and Natal, 770 bales; Buenos Ayres, 40 bales; Hamburg, 685 bales; elsewhere, NEW YORK, July 29 .- Wool steady; domestic

Cattle strong at \$3,40@5.25. Sheep steady at \$2.25@4.25; lambs active and higher at \$466.75.

THE HENWIFE VS. SPORT.

Dissertation Touching Cruelty and the Fatuousity of the Duckling. Forest and Stream.

Consider the way of the henwife who puts a setting of duck eggs under a hen. When in due course the ducklings come forth, over the brood with a solicitude not less vigilant than that of the maternal hen, and superadded to this with a woman's tenderness which hen nature can never know. She extricates them from the predicaments into which silly ducklings fall; and if one of them happens to be killed, she mourns over it with genuine pity and sighs for its untimely taking off. She notes from day to day with quiet satisfaction their astonishing growth; sees to their safe housing at night, making all secure against encroaching vermin; doctors them for the gapes and such other ills as duck flesh is heir to, rubbing on lard for this and applying sulphur for that; and in a thousand and one ways supplements with her own superior human wit the well meant but often mistaken mothering of the hen.
And all this for what? That when the fowl shall have attained a due stage of plumpness, tenderness, juiciness and avoirdupois, she may wring their necks or chop their heads off to make of them the piece de resistance of the summer boarders' Sunday dinner or to sell their carcasses at so much a pound in the poultry market. From the very moment the eggs were put to hatch, this final doom was her purpose. All the feeding, cherishing, protecting, nurs-ing of these ducklings was to preserve their lives and fatten them for killing. From before their birth they were predestined and foreordained by her to be brought into the world, to puzzle and guzzle their fleeting

appointed hour to die. Consider how the silly things vie one with another in growth; how they scramble at meal times, the stronger pushing the weak-er to one side and guiping more than their own share of the food; and consider how those who thus snatch the most to eat grow the faster and the sooner bring their heads to the block, their bodies to the cook, and the legend "roast duck" to the bill of fare. For in a brood of ducks it is not the fittest which survive; the fittest go first to execution at the hands of the henwife. And consider, moreover, how vain and foolish are the weaker ones left behind, who quack with joy to find themselves freed from the competition of their stronger brothers, and forthwith fatuously gorge themselves in peace and plenty, which means for them only that thus making up for lost time and putting on flesh they, too, must the sooner come to their undoing. For though they know it not, in their comings and their goings, their eating and drinking and making merry, ever over them stands the henwife. who is to them as the three fates-Clotho who spins the thread of life; Lachesis, who twists it, and Atropos, who cuts it.

Now, this henwife, who puts duck eggs to hatch that she may have ducks to kill, shall we account her cruel? Most certainly not though the final end of the entire operation is the death wrought by her own hand. Was only feigned selicitude, her compassion for ducklings in distress insincere? There was none ever more genuine, though the heart that pitied and the hand that helped them were in the end the heart and the hand that destroyed. In fact, and this is the point of our consideration-the henwife who raises tame birds to kill may be accounted as humane-and only as humane, no more, no

hour, to distend their little crops with mush

and corn and kitchen scraps, and at the

tame birds to kill. COLORED SUNS.

Planets Lighted by Blue, Green or Red, as Well as by Yellow Suns.

less-as her brother who hunts with a gun

wild birds to kill, and conversely, her

brother who hunts wild birds to kill with

a gun may be accounted as humane-no

more, no less-as the henwife who raises

Dorothy Leonard, in St. Nicholas. We are so familiar with the light of our sun that it is hard for us to realize that there are in the universe a number of suns which shine with blue, green, purple, yellow or red light. These colors are noticed when we examine them through the telescope. When we look at the heavens on a clear night we see a great many stars, more than we can possibly count; and all these, except the planets, are great, glorious suns, some of them many times larger than our own. Most of them shine with white light, like ours; but yet there are a good many which, viewed through the telescope, are found to be of various brilliant hues. The most strik-NEW ORLEANS, July 29.-Cotton quiet. Sales, ing and beautiful effects in coloring are met with in what are called the double stars. There are stars which appear single to us, on account of their extreme distance, but on examination, are found to consist of two or more stars comparatively near together; and when one or both of a pair are colored, they are, of course, exceedingly beautiful. In the constellation called the Southern Cross, one astronomer discovered a group, too far away or too small to be seen with the naked eye, which appeared to him like an elaborate piece of jewelry! For among a number of the ordinary stars were five green, one greenish blue and two beautiful red ones. In one of our northern constellations there is a large white star accompanied by one of companions of bright emerald green; while in another a double star has a large crange sun with a small blue mate.

Among the single stars, some of the brightest (which are famous enough to have old Arabian names—given them before the Christian era) are of quite decided color. For instance, Sirius is bluish white; so also are Altair, Deneb, and Vega; Arcturus is red; Capella is yellow; Rigel and several others are blue; and Aldebaran, Betelgeuse and Antares shine with bright red beams.

If any or all of these stars have planets circling around them, as the earth and other planets revolve around our sun, the color-ing must be brilliant indeed! In planets re-volving around the double suns we can imagine almost anything. One sun might rise in orange, green, or blue, while another set in red or purple, and at times the two suns might mingle their beams, a red sun with a blue sun giving purple light for part of the day, or a blue sun and a yellow sun giving green light

Changes have also been noticed in some of the colored stars; for we have ancient records of Sirius being a decided red, later it was white, while now it is bluish white. Another star, now blue, changed from red to yellow before it reached its present color. It is generally believed that it is some condition of the atmosphere around these stars that causes the coloring; that is, that a red star has an atmosphere that absorbs all the rays of light except the red rays, a blue an atmosphere that absorbs all but the blue rays; but how, or why it is so, or why the colors should sometimes change, we do not know. We know enough, however, to show us that more wonderful things exist in the universe, and more wonderful changes occur, than we could possibly imagine.
